Descripción:

We want to improve the quality of second language learning environments for low-literate adult migrants and refugees in Europe. We will achieve this by empowering second language educators with Open Educational Resources (i.e. teaching materials and benchmark-aligned learner products below the A1-level) and with 2 webinar series in 5 languages. In this process, we will enable L2 literacy learners to self-assess the progress of their learning and to become more self-directed L2 literacy learners.
