

Financing your stay. Possible Scholarships or Aids to come to Granada

You will find detailed information on the UGR 283 research groups, 1,419 lines of research, 1,391 technology services and 402 technology solutions currently registered.

The information available at the web portal of Knowledge Transfer from the University of Granada is classified by industry sectors (more than 20) and will provide you with information on the responsible researchers.

Locate in the Map of Knowledge of the University of Granada its research groups, lines of research, services and technological products, R&D support units and spin-off companies that are distributed across the different UGR centres.

TALENT HUB

The Andalucía Talent Hub Fellowship Calls (2) will give the opportunity to 50 experienced researchers to carry out their research with complete independence in their chosen destination. Participants will be able to freely choose their host institution both internationally and among the agents of the Andalusian Knowledge System aggregated in Campus of International Excellence based in Andalusia.

RAMON Y CAJAL

The “Ramon y Cajal” contracts are funded by the Spanish Government and are addressed to professional researchers in possession of a PhD degree who have presented a line of research. The host institution identifies and defines the research strategies and gradually and progressively co-finances research.

Applicants must have obtained their PhD degree in the last 10 years and have carried research abroad for at least two years or have their PhD abroad at least two years before the call.

HORIZON 2020

Horizon 2020 is the biggest EU Research and Innovation programme ever with nearly €80 billion of funding available over 7 years (2014 to 2020) – in addition to the private investment that this money will attract. It promises more breakthroughs, discoveries and world-firsts by taking great ideas from the lab to the market. Horizon 2020 is the financial instrument implementing the Innovation Union, a Europe 2020 flagship initiative aimed at securing Europe's global competitiveness.

MARIE SLODOWOSKA CURIE ACTIONS

These are some of the most significant aids that will remain active in the new European framework Horizon 2020 and in other European programmes. Targeted towards researchers at any point in their careers, whether from state or private entities. Among the activities supported are, initial research training for young researchers, lifelong learning and career development. It is essential to bear in mind that Marie Curie actions can be **individual** (applied for jointly by the researcher in question and the research centre where he/she will undertake his/her project), but there are also others positioned within the international cooperating network between centres.

Information available at:

In Europe: <http://ec.europa.eu/research/mariecurieactions/>

In Spain: <http://www.eshorizonte2020.es/ciencia-excelente/acciones-marie-skłodowska-curie>

ERC. EUROPEAN RESEARCH COUNCIL

The European Research Council (ERC) is a European agency that provides grants for fundamental research. Its grants (IDEAS programme) are given on the only criterion of scientific excellence, whatever the nationality (any researcher in the world can participate in the competition, although the work must be conducted in a laboratory in one of the European Union member countries or one of the countries involved in the 7th European Research Framework Programme).

Information available at:

In Europe: <http://erc.europa.eu>

In Spain: <http://www.idi.mineco.gob.es/portal/site/MICINN/>

ERASMUS MUNDUS

The Erasmus Mundus Programme is the global extension of the European student exchange programme, Erasmus2. Its aim is to enhance higher education in Europe through exchanges of students and academics between Europe and the rest of the world. It funds institutions to create joint Masters and Doctorates, as well as individuals (students and academics) by supporting mobility between universities through grants, for purposes that include taking these joint qualifications. Scholarships/fellowships are open to higher education students and academics from all over the world.

COIMBRA GROUP SCHOLARSHIPS

Founded in 1985 and formally constituted by Charter in 1987, the Coimbra Group is an association of long-established European multidisciplinary universities of high international standard. The Coimbra Group is committed to creating special academic and cultural ties in order to promote, for the benefit of its members, internationalisation, academic collaboration, excellence in learning and research, and service to society. It is also the purpose of the Group to influence European educational policy and to develop best practice through mutual exchange of experience. The three Scholarship Programmes offered by the Coimbra Group are enjoying a very high level of popularity, as shown by the results of the evaluation exercise carried out by the CG Office in 2013. All grant holders since 2008/9 were asked to participate in an on-line evaluation survey aimed at collecting data about grantees' research areas, mobility background, as well as information on the perceived impact of their CG scholarship on their career and on difficulties encountered.

MAEC-AECID Development Cooperation Scholarships

AECID is the Spanish Agency for International Development Cooperation, a body governed by public law and attached to the Ministry of Foreign Affairs and Cooperation. AECID is the body governing Spanish international development cooperation policy.

Special interest for researchers is Program I.4-Postgraduate scholarships for research and development cooperation projects. This is the newest program meant to recuperate the university and scientific cooperation in order to conduct research projects in the field of development cooperation. Through this program, researchers enrolled on master or doctorate studies are financed within the framework of a research project among Spanish universities and one of the countries partners in the Master Plan of Spanish Cooperation.

FULBRIGHT

The goal of Doctoral programs in Spain is to train the student in advanced research techniques. These programs are divided in two parts (ciclos): the first part consists of 60 classroom credits (courses from the Master's degree can count); the second part is the actual research, which culminates in the student's public defense of his/her original research project (Doctoral thesis). The program mandates a maximum of three years as a full-time student (study and research), or five years as a part-time student.

JEAN MONNET ACTIVITIES

Within the Erasmus + Programme, the Jean Monnet Activities aim at promoting excellence in teaching and research in the field of European Union studies worldwide. These activities also aim at fostering the dialogue between the academic world and policy-makers, in particular with the aim of enhancing governance of EU policies. Key activities include courses, research, conferences, networking activities, and publications in the field of EU studies.

THE FUNDACIÓN CAROLINA

The Fundación Carolina, a combined public-private institution, was created in 2000 with the purpose of fostering cultural, educational and scholarly cooperation with the Ibero-American community of nations, while including private management criteria in the execution of its activities.

The foundation's initiatives are determined by the two core programmes that comprise the content of its activities: the Training Programme and the Visitors Programme. The principle of excellence is the most important criterion in both its training and its management of international visits and encounters.
