

Partner's search from Istanbul Aydin University.

E-mail received from **Bengu Bostanci**- UK Representative  
Istanbul Aydin University [bengubostanci@aydin.edu.tr](mailto:bengubostanci@aydin.edu.tr)

I'm a member of international team in Istanbul Aydin University from Turkey, but I base in London and expanding our partners all over the Europe. I would like to let you know, as a growing market in Turkey, there is a huge demand from student to have opportunity to study abroad in terms of Exchange, study abroad, top-up degree programs.

We aim to gain insight, practical knowledge, and valuable international connections to better our university and the overall Turkish Higher Education system. We would like to develop a cooperation on educational and cultural programs such as summer schools, dual degree programs, study abroad, specific scientific research fields and create a relationship through under the framework of LLP-Erasmus programme with your esteemed university. We would be glad to get opportunity to develop such programs in the light of a memorandum of understanding.

Please see the University catalogue; <http://catalogue.aydin.edu.tr/>

Please for more information visit our website; [http://www.aydin.edu.tr/en\\_index.asp](http://www.aydin.edu.tr/en_index.asp)

Also please visit our Erasmus webpage;

<http://erasmus.aydin.edu.tr/> For description of courses; <http://www.ebs.aydin.edu.tr/>

And also I would like to take into account my suggestion under the Erasmus Training Agreement procedure. **Regarding to the Erasmus Training Agreement; I would like to say that Istanbul Aydin University has the biggest technology centre united in one place in Turkey at the moment. Our laboratories was designed and equipped in accordance with modern laboratory safety regulations and testing facilities. We have 12 laboratories. We are sending our students to the companies, some departments of universities especially to the laboratories of the universities during the summer. As you know with the Erasmus training agreement students get experience in their specific field. Please let me know if you would like to accept our students for training purposes and also if your students would like to come and get experience in our technology centre, we would be happy to host them. Please see more information about university and also the link for Technology Center in below. I assume this is a very good opportunity for engineering faculty students explore different experience under the terms of Erasmus Training Agreement.**

Please see Technology Center; [http://erasmus.aydin.edu.tr/katalog/erasmus\\_technocenter/index.html#/1](http://erasmus.aydin.edu.tr/katalog/erasmus_technocenter/index.html#/1)

The faculties in our institution by subjects; (most of the subjects are taught in English). Please let me know specific subject areas, I can provide more informations.
