ARTiculate -an Alternative Approach for Participation in Democratic Life:

Project's objectives:

-To provide an alternative setting for young persons at risk of social exclusion to assert their views on social, economic, environmental, and other crucial issues via project implementation, workshops and creative expression.

-To empower young Europeans to become active citizens, and encourage them to participate in public discourse through short-term mobility, project implementation, non-formal, informal and intercultural learning.

-To raise young people's awareness on European common values and fundamental rights, equality, non-discrimination and social inclusion.

-To raise awareness at national and EU level regarding issues young Europeans prioritize.
