Developing a Biosecurity Training Program for Preparedness for Future Disasters and Increasing the Vocational Skills of Microbiology Laboratory Health Professionals (MicroLabSecure)

Tipo de proyecto: KA2 Small-scale Partnership

Fechas: 01-09-2024 28-02-2026

Coordinación: Turkish Society of Microbiology (Turquía)

Socios:

University of Minho (Portugal)

Universidad de Granada (España)

Descripción:

This project aims to identify the biosecurity risks and management that medical microbiology laboratory workers may face before, during, and after a disaster, to increase the vocational skills of workers on biosecurity, and to create a digital training set and resource center.
